P-05-1181 Sea bottom trawling is killing our marine wildlife...Stop bulldozing our seas!, Correspondence – Petitioner to Committee, 13.09.21

Dear Committee Members,

I thank the Minister for her comments but I am disappointed that she could not be more proactive in her role of protecting our marine environment. We desperately need new initiatives which will strengthen our current MPA's and commitment to creating more MPA's so our fragile marine wildlife may be better protected.

Kind Regards
