'Any attempt to fluoridate a water supply by a government or health body is a means of compulsory medication. The government should spend more money on public health and dental protection also food and drink producers should cut the amount of sugar put into soft drinks and sweets which is having a detrimental effect on children's teeth. There are also toothpastes which contain fluoride. There are alternatives to protecting the nations teeth without resulting to mass fluoridation.'

Darparodd y deisebwr datganiad ategol, mewn Saesneg yn unig:

'The Language Unit of Bangor University recently released an Apple Mac version of Cysgliad as a free download, with funding from the Welsh Language Board. But what about the other 90% of computer users in Wales that use Windows? Surely the small businesses, children, home users would benefit from this package too? Canolfan Bedwyr can still charge for and support the network version for large institutions, but the stand-alone version would be of immense benefit to home users if it was widely and freely available. Not everyone can afford the £50+ that this package costs in the shops.'

'Castle Care homes are a private company that wants to make a profit out of bringing problem children to our village. Their web site: <http://www.castlecaregroup.co.uk/about-us.htm> What problems? 1. The children are too difficult to place in foster care.

Castle Care specialise in working with young people who have complex emotional needs that are often expressed through challenging behaviour and issues with social relationships.

2. The children are too difficult to be placed in our schools.

We have very good mainstream schools and special schools linked to our authority where transport is provided. These children need to be educated on site, therefore one can assume that these children must have serious social and behavioural problems, as stated on Castle Care Homes website.

3. The children will be allowed without supervision into the community

The property is situated in a residential street surrounded by children of all ages. Given the type of child being placed within the care home and having been informed by the Regional Manager Dan Svenson of Castle Care Homes that the children in care will be free to socialise and mix with the local community, we do not feel that this is appropriate or safe for the local children.

4. Will be living opposite children's recreation facility and playground

There is a local children's playground not more than 100 metre away from the property and a local golf range directly opposite, which are used by the local community and schools. As stated above we do not feel that this is appropriate or safe for the local children to use if those cared for in the proposed home are allowed access as suggested by the Regional Manager, given their behavioural problems and the danger they may impose to the local children.

5. The property's location is not suitable for these types of children.

Although detached, is close to its neighbouring properties. This is not a secure home nor suitable for teaching purposes given the close proximity to the neighbours. Noise will be of an issue.

6. Our village has more than its fair share of care homes.

9. Our village has more than its fair share of care homes with six homes (one of which is a secure home) in a population of 2,552 persons approx.'
