Ymateb gan unigolyn/ Evidence from individual

Hello,

I am really very busy this month, so I can't make the time to do this properly. I would like to say that I think really strong measures are needed to bring about the many benefits of actions to reduce climate change. This includes emphasising the benefits of living in more eco-friendly ways, like walking, cycling, saving money, being healthier, feeling better. I'm sure you can think of benefits for every action we take to reduce our impact and bring about better alternatives.

I'm responding as an individual who works for three 'green' organisations and has a young child.

Thank you for your time,
